

FT3: Where Precision Medicine Gets Real

FT3 (From Testing to Targeted Treatments) is a global, patient co-led, multi-stakeholder initiative accelerating the shift from precision medicine's promise to its everyday practice.

We act as a convener, connector, and catalyst—supporting those on the ground who are working to make personalised healthcare available to everyone who can benefit from it. FT3 is where collaboration becomes implementation. Where tools become action and where champions become system-shapers.

What Makes FT3 Different

Patient-partnered
at every level
from governance to
co-creation and
delivery.

Truly multi-stakeholder
connecting industry, HCPs,
patients, and policymakers
to build trust and shared
purpose.

Outcome-focused
and scalable
practical solutions, with
lessons that travel across
regions and disease areas.

What We Do

- ✓ Co-create solutions with people across the care pathway — patients, HCPs, industry, and payers
- ✓ Build system readiness by connecting diagnostics to treatment, access to policy, evidence to value
- ✓ Pilot and scale local interventions with global relevance
- ✓ Convene networks to learn from real experiences and amplify impact
- ✓ Support implementation with tools, templates, and shared evidence

Why Stakeholders Join FT3

Patients & Patient Orgs

FT3 helps us tackle local challenges, grow our voice in the PM ecosystem, and access tools that drive better outcomes.

- Co-develop real tools, not just talk
- Build capacity for diagnostics and access
- Connect with a global learning community

HTA Bodies & System Leaders

FT3 bridges evidence, patient needs, and clinical realities to shape more useful value frameworks.

- Access case studies and care-level data
- Anticipate implementation challenges
- Co-develop scalable, value-aligned solutions

Pharma & Diagnostics

FT3 enables multi-stakeholder co-creation that de-risks innovation and aligns access conversations.

- Inform access strategies with real-world data
- Collaborate across the pathway (not just in silos)
- Accelerate diagnostic and therapy integration

HCPs & Medical Networks

FT3 brings clinical realities into the conversation and equips us with tools for point-of-care impact.

- Shape decision-making tools
- Make genomic testing usable for patients
- Influence system strategies with frontline insights

Measurable Impact

7+

country pilots improving policy, care, and access

3,000+

views of FT3's scoping review on genomic testing

1,385+

resources shared via the Synapse Precision Medicine Network

50+

champions equipped with advocacy and value-based messaging tools

PED

and value drivers being integrated into HTA and system discussions

Pilots

in Spain, Nigeria, Hungary, Philippines, and more

What You Can Do in FT3

FT3 gives you the tools, the community, and the momentum to make change stick. So, you don't need to start from scratch.

Join the global Community of Practice

Use and adapt ready-to-go tools, templates, and pilots

Collaborate in working groups, leadership labs, and new country pilots

Share your work via the Synapse Precision Medicine Network

Partner to scale what works in your region or sector
